Subject ( 9088052 ) Re\_ Delfasco - Additional Passive Soil Gas Sample Results 

I can only see it on the Bberry but it looks very consistent to me. It shows a plume FROM Delfasco to the NE. The new samples do not expand the area of concern. I.E. No new houses included.

Subject Delfasco - Additional Passive Soil Gas Sample Results

Greg,

As you are aware, Site Assessment conducted a passive soil gas survey at the Northeast 15th Street GW site and the Southeast 14th Street GW site in November. We also installed and collected seven (7) passive soil gas samples at the Delfasco property to augment the survey you had previously conducted in August. Attached for your review is the preliminary data and maps associated with the Delfasco samples.

If you have any questions or would like to discuss these results, please let me know.

Thanks,

Bret Kendrick
